

# THE NATIONAL JUDICIAL COLLEGE

TRIBAL JUDICIAL CENTER

## Impaired Driving in Indian Country

June 21 - 23, 2022 | Mystic Lake Casino Hotel - Prior Lake, MN

DUI cases can be complicated and confusing. Judges must balance the different competing interests that often are present in a DUI prosecution. It is important that judges know about the intricacies of the stop, search and seizure issues, arrests, and a myriad of other criminal procedure issues, including motions for bail and sentencing issues. Further, judges need to be able to rule upon issues with regard to breathalyzer, blood/alcohol tests, field sobriety tests and have an understanding of the pharmacological effects of alcohol and drugs. Many cases involve the self-represented litigant which presents additional concerns and challenges. This program provides judges with state-of-the art information on these subjects and many others.

### After this webinar, you will be able to:

1. Analyze circumstances providing legal basis for stop, search, seizure & arrest and admissibility of testimonial or physical evidence;
2. Enhance judge's ability to rule on evidentiary issues;
3. Apply the elements of a constitutionally valid guilty plea;
4. Identify legal issues presented concerning field sobriety tests and other demonstrative evidence per individual Tribal Code;
5. Deal with special concerns regarding the self-represented litigant;
6. Recognize and discuss principles of pharmacology to more effectively evaluate expert testimony; and
7. Appraise and design effective sentences.

---

Through a grant from the National Highway Traffic Safety Administration (NHTSA), The National Judicial College (NJC) is presenting this three-day program. Full airfare/lodging reimbursements are available. Seating is limited and first come first served. ***Do not book travel until directed by the NJC.***
